## The Conservation Pledge

*I pledge to protect and preserve the natural resources of the planet Earth, and promise to promote education so we may become caretakers of our air, water, land, forest, and wildlife.*

Maria Rodale

Maria Rodale surmised back in 2000 that MONSANTO would announce they had stopped developing *Terminator* technology as a cover up to deflect public anger. At the time, 14-years ago 31 other companies and public institutions besides MONSANTO held patents involving seed sterilization techniques. She guessed MONSANTO would secretly align with the PENTAGON to create cahoots with the military to take over the nation and to try to take over the world. Ms. Rodale felt global citizens would, however, revolt over GMOs rendering animals, insects, and humans sterile.

Her physic premonitions saw decades of chemical agricultural and manufacturing, as well as toxic waste from nuclear-energy plants, commercialized food having been poisoned by chemicals, genetic engineering, and radiation, and what families would need most would be to learn how to grow your own organic food. She sensed there might be water squabbles, but suburbia would protect their urban tomato patches and chickens. She also foresaw that antibiotics would be rendered useless due to their overuse in livestock. And toxic computer and other consumer waste would need to be dealt with.

## Best Case Scenarios

Einstein said the imagination is stronger than willpower, so Maria Rodale used her brilliant mind to play with best case scenarios as well, and as best she could 14-years ago, she described the best case scenarios of a *Wonderful World Tomorrow*.

Can we play with Ms. Rodale's power of pretend to join her in making believe that Robert Shipiro, MONSANTO's CEO at the turn of the New Millennium, would ultimately realize the potential of turning poop, and food and yard waste, into a high-quality MONSANTO organic fertilizer compost. If it seems facetious to even entertain the idea, buckle your seat belt, there are no limits in the field of creating a culture where it's easy to be good. We're about to take off with some surprises that might tickle your funny bone as it did hers.

How about fantasizing that, just in the nick of time, water would be recognized globally as the precious resource it truly is. Ms. Rodale used her power of good imagination to see ahead to a time when all nations of the world would unite and sign a water-protection treaty, ban chemical agriculture, and ban nuclear energy.

She visualized mountain streams as drinkable again. And in her mind's eye she pictured fish and other sea life thriving. She saw in her head that all swimming pools would become clean yet chlorine-free, and a time when health and longevity would be inclusive of all people, everywhere.

Leave it to Ms. Rodale to prophecy that trash recycling would become big business. Young entrepreneurs would start companies to turn trash into airplanes, cars, homes, shoes, and almost anything. Paper would be made from recycled trash. Forests would thrive and wood would be a specialty item used only for crafts, fine furniture, and toys. Old Mac computers and Sony TVs would be recycled into building materials for strong houses and skyscrapers.

In her vision of a *Wonderful World Tomorrow*, Ms. Rodale foresaw organic gardening and organic farming would become the accepted norm. With clairvoyant vision she glimpsed ahead to Today's World when chemical agribusiness would be scorned and entire neighborhoods would disapprove of chemical fertilizers, herbicides, and pesticides. Public schools would introduce organic gardening as a required course of study from *Kindergarten* through *High School* because eating food as *Mother Nature* mandates is the key to happiness and good health. Man would usher in a *Golden Age* of artistic creativity and the whole world would be at peace.

She thought ahead to an unspecified time in the near future when her *Happy Organic Gardening* scenario would come true, and even though she might not be here 100-years from now, the *Rodale Family* legacy of ORGANIC GARDENING MAGAZINE could lead the next generation into a truly good place.

According to Ms. Rodale we all have the power within us to create the future we desire to create, and everything we do matters. Yes we can generate happiness, health, and peace in our lives and in the world around us, by eating organic vegetables. She also encouraged exercise and being cigarette-free. Your lungs were not made for smoke.

#### Be a Movie Viewer

Can we establish that what is happening is real and determine the best possible solution. The documentary that is going to shock your socks off is the 2012 film, that is a cold splash of water in the face for waking up those with *Laodicea tendencies*. One can, Dear Reader, benefit from watching **Seeds of Death, Unveiling the Lies of GMOs** in its 80-minute entirety at <http://topdocumentaryfilms.com/seeds-death/>.

You might want to see the other food documentaries now, as well. **All Fed Up** is a forthcoming new documentary film that shall be released soon.

The director of **The Future of Food** has made a stunning new documentary. Deborah Garcia's fabulous film was chosen as the NEW YORK TIMES critic's pick. **Symphony of the Soil** was filmed on four continents and the website is [www.symphonyofthesoil.com](http://www.symphonyofthesoil.com). If you consider food freedom as a human rights issue then you will feel ready to begin opening up to the feelings in your heart as you completely EARTH yourself. For more information, or to purchase DVD's contact 415.383.0553, or email [info@lilyfilms.com](mailto:info@lilyfilms.com).

A person might view an earlier documentary **Bitter Seeds** about why INDIA, as a nation, sued MONSANTO & COMPANY for bio-piracy. Here's the link where you can watch the movie: [http://www.huffingtonpost.com/zester-dail/bitter-seeds-film\\_b\\_1902221.html](http://www.huffingtonpost.com/zester-dail/bitter-seeds-film_b_1902221.html)

Promise yourself you will also obtain and share the documentary film **Homegrown Revolution** from the Jules Dervaes family at [www.pathtofreedom.com](http://www.pathtofreedom.com). The Dervaes and others of like-heartedness share their love of organic gardening and seed saving in the city. Generation Z is arriving on a chemically poisoned planet that could be restored to an organic *Garden of Delight* everywhere on EARTH.

### Fight Food Tyranny

There is a reason the giant chemical companies have fought hard to prevent GMO food labeling laws in the *United States of America*. The **Seeds of Death** whistle-blower film exposed the "Epicyte Gene" developed by a CALIFORNIA company to kill male sperm. DUPONT and MONSANTO & COMPANY purchased the EPICYTE firm and COMMERCIALIZED the "Epicyte Gene". You would want to know whether the "Epicyte Gene" is one of the *Genetically Modified Organisms* (GMOs) in AMERICA's food, wouldn't you.

Wouldn't you want to know if the teen pregnancy rate in AMERICA has dropped because of the "Epicyte Gene" in the GMO food school lunch programs had sterilized all of AMERICA's little sons. Wouldn't your young daughters want to know that young married couples in the *United States of America* are having a harder time conceiving, or a baby may be born sterile. I mean if you were a young wife and your husband was irreversibly sterilized without knowing his employee cafeteria GMO food had killed his sperm without his informed consent. Wouldn't you want GMO ingredients labeled and food transparency. If you are parents who would like to stay informed with the grassroots campaign working to get the GMOs labeled in the *United States of America*, visit [www.POPCampaign.org](http://www.POPCampaign.org) and [www.MOMS4POP.org](http://www.MOMS4POP.org)

The founding director of the FOOD AND DRUG ADMINISTRATION's (FDA) "Office of Biotechnology", Dr. Henry Miller, shamefacedly asserts that AMERICA's food contains *Genetically Modified Organisms* that were modified with gene splicing techniques. He claims that virtually all the grains, fruits, and vegetables in the American diet have already been irreversibly genetically altered, often through wide transgenic crosses, which move genes from one genus or species into another IN WAYS THAT DO NOT OCCUR IN NATURE. He claims only wild berries and wild mushrooms have not been altered.

The first *Bush Administration* created a place in the federal FOOD AND DRUG ADMINISTRATION (FDA) for MONSANTO's former Attorney and Vice President, Michael Taylor. Under the *Obama administration* Michael Taylor became the food Czar as head of the FDA. MONSANTO's megalomania is to make organic agriculture illegal. If that occurs then the American People might as well pledge allegiance to the flag of one nation under MONSANTO and *Hail Hitler*. The *United States of America* has been goose-stepping to Michael Taylor's and Dr. Miller's food fascism.

If population control is being successfully achieved through *Chemical Agribusiness* with its genetic engineering, chemical herbicides, chemical insecticides, and the "Epicyte Gene" has been commercialized, when and how did all this actually begin. It may enlighten you to discover for yourself the origins of GMOs harkens all the way back to *Project Paperclip* when chemists from GERMANY came to AMERICA. Leftover war chemicals were utilized by their modern, superior techniques to craft "improved" man-made chemical agricultural products. But it is your human right to protect yourself from harm.

### The FDA's Bogus "Cigarette Science"

Easy, automatic resistance to the FDA's authority may not seem culturally creative. We in AMERICA have been trained to *not* resist distorted perceptions of the Biotech hirelings. But whether you like it or not, EARTH has commenced a food war. Major markets are fighting AMERICA's GMO food despotism.

Sixty-six nations of the world have had the strength of character to buy out of *Biotechnology's* "cigarette science" agenda that calls evil "good" and good "evil". At first it may seem a bit confusing to disagree with the FDA's confirmation bias claims that GMO seeds are "Science-based" until you remember Agent Orange, DDT, lead, and etc. were all "Science-based" and deceptive to the max. Some people will do anything for money, but some people won't. Since the word "Science" means "Knowledge", sooner or later Man will resolve this difficulty of the forbidden *Tree of Knowledge* of Good AND EVIL agricultural practices.

May 19, 2014

Page 4

It is written that you shall know them by their fruit. What is truly good makes whole and does no harm. This truth shall be known and it shall make you GMO-free. Sooner or later you are going to be able to look back on the prevalent GMO marketing research myths and laugh about it. Cartoonists have already begun to poke hilarious jabs at the GMO scammers and their ridiculous lies.

If you happen to read the FDA's fallacious reasoning that Organic farming is a luxury only rich populations can afford. Ladies and Gents put on your *Capes of Good Courage* to be an organic consumer. By voting with your food dollars you are actively participating in the mission to create a sustainable global environment. With the popularity of organic consumers demanding USDA CERTIFIED ORGANIC and NON-GMO VERIFIED food, you can begin to enjoy the simple things in life again.

#### What Does the Bible Say

If you want to get religious about GMOs, you've got to get to the *Genesis prototype*. Ultimately the *Tree of the Knowledge of Good and Evil* brings to bear biotech science run amok. Let's hope that Michael Taylor and Dr. Henry Miller's FDA Programme has not seared the conscience. Up next is unmanned drone spraying of agricultural pesticides that will have the power to "*Sting*" just like the description of aerial "*insects*" in the book of *Revelation*. There was no vocabulary 2,000 years ago to describe unmanned aerial drones keeping sky patrols.

Having said that, how foolish of the Abrahamic faiths to disregard *Genesis 27:28*, "*May God give you heaven's dews and earth's richness*" by allowing science-based laboratory spears to abominate the pure genetic seeds of *Genesis 1:23*. When Man is irreverent toward *Mother Nature*, there is impiety upon EARTH.

A solution might be for the religious right and what's left to unite in creating a *Garden of Delight* with an abundance of fresh organic heirloom seeds full of life. Love for the next generation is such a phenomenal ingredient for life. Many organic farmers know about this and it is time to speak openly about it.

Moms All Across America are making the connection to what is so much missing at the MONSANTO's in these times. What's been missing in chemical agribusiness is namely the vibration of *love*. Love is a major piece of input in the kind of farming that makes people well, in GOOD TILTH. The next biodynamics conference takes place from November 13-16, 2014, in Louisville, KENTUCKY.

#### The Family Farms Measure 15-119

OREGON is a people's initiative state and it is your human right to protect your body from harm. Your vote must be received by 8 p.m. on Tuesday, May 20<sup>th</sup>. The eyes of the world are on the people's initiative to create a U.S. paradigm shift in human rights for small Family Farms.

#### The Rogue Farm Corps Movement

U.S.D.A. *Certified Organic* products promote health and wellness and are made with loving care. Organic consumers need more U.S. *Family Farmers* to cultivate tens of thousands of acres of sustainable, organic farmland. Organic consumers need an ORGANIC AMERICA at the heart of our nation because we are committed to be living embodiments of love and consciousness in action.

There is a chain of connectedness, love, and respect between Mother Nature, organic farmers, and organic food consumers that needs safeguarding. In OREGON, the *Rogue Farm Corps* provides training and a life of dignity to our local Family Farmers, bringing health and happiness to you.

May 19, 2014

The network of farm diversity in the *Rogue and Southern Willamette Valleys* has joined the worldwide movement to cultivate a new crop of organic farmers. The *Rogue Farm Corps* is a part of *Our Family Farms Coalition* that sponsored the YES ON MEASURE 15-119 Campaign.

The natural *Laws of Creation* are life-affirming. Saving pure genetic seed has been a sacred human right since times of antiquity. If you are either a beginner or an aspiring farmer seeking in-depth training to launch your own organic farm business, then *Rogue Farm Corps* is for you.

The training is led by dedicated eco-agricultural professional mentors who are dedicated to training the next generation of organic farmers. You will receive hands-on training as well as classroom learning. You will be taught organic flower, herb, seed, and vegetable production, marketing, and distribution techniques. **For more information or to enroll in the Rogue Farm Corps, call 541.951.5105 in OREGON. The website is [www.roguefarmcorps.org](http://www.roguefarmcorps.org).**

#### President Obama's Dodd-Frank Dilemma

Did you ever wonder what the unspoken warrant of advertisers may be. For example, why did [www.LaRouchePAC.com](http://www.LaRouchePAC.com) pay to run an ad in the WASHINGTON TIMES on April 8, 2014, claiming that your bank deposits could be confiscated because the DODD-FRANK law was signed by President Obama and by the EUROPEAN UNION, to pay off London and Wall Street bank debts if the entire Trans-Atlantic financial system collapses.

The advertisement presupposed that the \$20 billion bubble is about to burst. It presupposed that the USD global carbon market operate the UNITED NATIONS (UN) World Bank pilot projects.

In addition to those presuppositions, LaRouche raised the constitutionality question. He cited President Obama's signature on the DODD-FRANK law as having bypassed Congressional authorization. This is where the constitutionality question comes in. Did the President's action protect the *Constitution of the United States of America* as he was sworn into office to do.

If La Rouché gets Mr. President taken to trial before the U.S. Supreme Court of Law as implied by the WASHINGTON TIMES advertisement, the highest court of AMERICA has verdict power to impeach U.S. Presidents. When he was sworn into office, Mr. Obama raised his hand swearing NOT to commit Treason against the *Constitution of the United States of America*. The Supreme Court decides impeachment cases because the said *Constitution* established three EQUAL and SEPARATE branches of check-and-balance Powers. The Presidency is under, not above, the *Constitution of the U.S.A.*
